

Health and Care Workforce Covid Vaccinations

12/1/2021

All health and care workers in Sussex are able to book a vaccination at one of the six hospital-based vaccination sites across Sussex. This includes:

- All NHS staff from primary (including general practice and general dental practice), community and secondary care.
- Staff of independent and third sector health providers.
- Care and care home staff in public, private and not for profit sectors

Health and Care workers can follow the link below to book an appointment:

Mass Vaccination Sites/Hubs 12/1/2021

The press will be announcing the location of a number of mass vaccination sites over the coming weeks - we do not have details at this stage.

You may receive a letter inviting you to make an appointment at one of these sites and if you are able to travel to the site you may wish to make an appointment as you may get the vaccine sooner than if you wait for a call from the surgery.

You do not have to attend a mass vaccination site - this is your choice and we appreciate that some patients may not be able to travel to these sites.

If you decide to book an appointment please be assured that all the information and details of your vaccination will be sent to your GP in due course so your records will be updated.

If you decide not to book an appointment at one of these sites we will still be contacting you when you we have appointment that is available for you.

Please do not contact the surgery regarding any letters for the vaccination centres as we have no other details.
